meet our team

You already know our team. They have been successful leaders and administrators in best-practice CCHF clinics for years. Some are still in those roles. What makes us unique is that we understand the values and mission of your organization and recognize the challenges you face in pursuing excellence while remaining missionally faithful. We are committed to reinforce your values while helping you transition and grow.

We have a network of on-demand consultants; working practitioners with various areas of expertise. Contact us at info@CCHFSolutions.org

about us

Christian Community Health Fellowship (CCHF) is a community of Christian healthcare professionals who are committed to living out the gospel through healthcare among the poor. What we have in common is that we consider our careers and training in healthcare as a missional calling to serve Christ.

CCHF has been a trusted advisor to faith-based clinics for the past 40 years. We have worked with free, charitable, and direct pay clinics, as well as Federally Qualified Health Centers and Look-Alike clinics. We understand the strengths and limitations of all models, and know the best practices that make health clinics viable and sustainable.

We will stand with you as partners, empowering your team to grow and develop while honoring the role of faith in your management and operations.

Most importantly, we understand that the mission of the clinic should not be determined by its model. The model must serve the mission. For years we have provided insights and advice to CCHF clinics, helping them through creative processes that have enabled them to remain true to their calling. As the number and complexity of these organizations have grown, we have created CCHF Solutions to meet the demands for higher-level management consulting within the CCHF community and beyond.
